

Abstract of DisclosureImprovement On Cleaning Implement

5 A cleaning implement (2) comprising a body (4) from which
extends an elongate handle (6), a plurality of bristles
(12) depending from an underside of the body (4), and an
elongate squeegee blade (20) formed of resiliently-flexible
material arranged on the body (4), extending in a direction
10 generally transverse to the direction in which the handle
(6) extends, and generally transverse to the direction in
which the bristles (12) extend.
